Virtual DJ Pro is the most popular DJ solution on the Mac, and it's what keeps our team going every day. Why? Because we know that being a DJ is just as much about music and mixing as it is about technology. And we care about that. At JAM Studios, we're always looking for ways to improve the DJ experience, and our passion for technology keeps that process moving along. With the growing popularity of MP3 players and the increase in people who are looking for ways to mix music, DJs are constantly looking for ways to improve their craft. The problem is that many people just aren't using the best tools available. The new FutureDecks DJ Pro offers improved search, a new BPM display, and a fresh user interface, and it's the same FutureDecks DJ Pro that won Mixmag's reader's choice award in 2008. FutureDecks DJ Pro adds even more great functionality while keeping the simple yet powerful interface that DJs have come to expect. Features: ✓ Four decks included with over 75 pre-set effects ✓ Edit function ✓ Editing tools and effects ✓ Sliders ✓ Preview/Album function ✓ Performed by the world's most-sought after DJ, Sam Potts. ✓ Edit and organize your MP3 collection with complete ease ✓ Browse over 80 million songs ✓ Control all your decks from anywhere ✓ Search function ✓ Editing tools and effects ✓ Sliders ✓ Preview/Album function ✓ Performed by the world's most-sought after DJ, Sam Potts. ✓ Edit and organize your MP3 collection with complete ease ✓ Browse over 80 million songs ◆
