Keymacro is a keyboard macro software, also known as a macro recording tool, that helps you create keyboard shortcut macros that will perform specified actions. Macro recording keystrokes can be extremely useful when working on a computer. Some actions, such as web browsing, can be done faster if you record a keystroke sequence instead of typing. Macro recording keystrokes can also be useful when you need to copy large amounts of data, such as when you use a scanner and wish to quickly reproduce your scanned documents. Macro recording keystrokes can also be useful when you need to type frequently the same text. This can be, for instance, when you are working on a document where you need to create the same phrases or in a word processor, where you need to type frequently the same sentences. If you need a certain program to be run on your computer, like a web browser or an e-mail program, then you can record a sequence of keystrokes that will start the program automatically when you hit the desired keys. KEYMACRO uses a unique video editor that allows you to select what you want to record. It also has a built-in database for storing the macros you have created. As a result, you can launch a program by pressing a key combination, select what macro you want to use and later edit it by pressing the arrow keys. KEYMACRO can also be used for simple macro recording, where you can record a keystroke sequence and later use the recorded macros. The application has a simple interface and does not require prior knowledge of programming languages. KEYMACRO allows you to record keystrokes from any application or from the Internet. You can use Keymacro to record e-mail messages, messages in chat applications and even to record web pages that you visit. You can also use Keymacro to record all the programs that you use on a computer. It can help you make a custom keyboard shortcut that will open your favorite application and start recording. Keymacro can also be used for creating simple macros for your web browser. You can record a keystroke sequence and use the recorded macros later. NOTE: Keymacro is compatible with all types of video file formats, such as mpeg, avi and wmv.
